

Episcopal Diocese of Georgia

COVID-19 Safer Standards Chart

January 17, 2021

Click the text in the colored box below to see the full guidance for that level.

Yellow Level

Fewer than 25 cases per 100,000 and hospitals are at less than 85% capacity

Orange Level

From 25 to 34.9 cases per 100,000 and hospitals are at less than 85% capacity

Red Level

From 35 to 59.9 cases per 100,000 and hospitals are at less than 90% capacity

Dark Red Level

60 cases or more per 100,000 in your county OR hospitals are at greater than 90% capacity.
No in person gatherings. Worship offered online only (livestream, pre-recorded, Zoom, etc.)

NOTE: Congregations may move to the lower level of guidance (such as from orange to yellow) after 14 days of being under the threshold for that level.

- 12 Step groups will be a case by case with approval of Bishop.
- Funerals, baptisms, and weddings will be case by case with approval of Bishop.
- See below for [Guidelines on Cleaning and Disinfecting](#)

Guidelines on Cleaning and Disinfecting

The virus that causes COVID-19 spreads most often by respiratory droplets. When someone infected with COVID-19 coughs, sneezes, or talks, respiratory droplets that contain the virus go into the air and can be breathed in by someone nearby. Less often, the virus can get into your body if it is on a surface that you touch and you then touch your eyes, nose, or mouth. The virus cannot get into the body through your skin.

- **Cleaning removes** dirt and most germs and is usually done with soap and water.
- **Disinfecting kills** most germs. How well it works depends on the type of chemical used and on using the chemical product only as directed on the label.

Routine cleaning and disinfecting

Clean and disinfect surfaces and objects that are touched a lot at least daily. Clean between worship services. Items to disinfect include:

- Door knobs and handles
- Stair rails
- Pews
- Handrails
- Light switches

It is not necessary to always use disinfectants as some hard surfaces are rarely touched, for example, floors or bookcases.

Soft surfaces, such as pew cushions, do not need disinfecting or cleaning after every use of the space. When you do clean these surfaces, use products that are approved by the EPA for use against the virus that causes COVID-19 and that are suitable for porous surfaces.

See CDC: Cleaning and Disinfection for Households (www.cdc.gov/coronavirus/2019-ncov/prevent-getting-sick/cleaning-disinfection.html).

In effect as of January 17, 2021

The changes in level are triggered by the 14 day average case counts per 100,000 at <https://dph.georgia.gov/covid-19-daily-status-report>
